LEM220.01

CERTIFICATO DI SISTEMA DI GESTIONE

Certificato n.:
50651 - 2009 - AQ - ITA - SINCERT

Data Prima Emissione:
30 marzo 2009

Validità:
31 marzo 2024 - 30 marzo 2027

Si certifica che il sistema di gestione di

DUBHE S.r.l.

Via Sestriere, 3 - 10060 Candiolo (TO) - Italia

e i siti come elencati nell'Appendice che accompagna questo certificato

È conforme allo Standard:

ISO 9001:2015

Questa certificazione è valida per il seguente campo applicativo:

**Commercializzazione di motori originali per mezzi di trasporto per persone, merci e altro.
Commercializzazione di ricambi originali e non, a marchio proprio di parti di motore per
mezzi di trasporto per persone, merci e altro. Fabbricazione e commercializzazione di
ricambi per autocarri ed autobus
(IAF 29, 22, 18)**

Luogo e Data:
Vimercate (MB), 03 aprile 2025

SGQ N° 003 A
SGA N° 003 D
SGE N° 007 M
SOR N° 004 F

MANAGEMENT SYSTEM CERTIFICATE

Certificate no.:
50651 -2009 -AQ -ITA -SINCERT

Initial certification date:
30 March 2009

Valid:
31 March 2024 — 30 March 2027

This is to certify that the management system of

DUBHE S.r.l.

Via Sestriere, 3 - 10060 Candiolo (TO) - Italy

and the sites as mentioned in the appendix accompanying this certificate

has been found to conform to the Quality Management System standard:

ISO 9001:2015

This certificate is valid for the following scope:

Sales of original engines for vehicles for transport of persons, goods and other. Sales of original spare parts and non original spare parts under own brand for engines for vehicles for transport of persons, goods and other. Manufacture and trade of trucks and buses spare parts (IAF 29, 22, 18)

Place and date:
Vimercate (MB), 03 April 2025

For the issuing office:
DNV - Business Assurance
Via Energy Park, 14, - 20871 Vimercate (MB) - Italy

INTRODUZIONE

INTRODUCTION

ITA

Il marchio **Lema** nasce nel 1969 e si specializza nella progettazione, produzione e commercializzazione di ricambi per autocarri ed autobus.

Nel corso della sua crescita, il marchio sviluppa una solida competenza tecnica per la realizzazione di guarnizioni e di componenti in gomma-metallo lavorati con materie prime di elevata qualità.

La continua ricerca dell'eccellenza è data dagli accurati controlli qualitativi applicati in tutte le fasi del processo produttivo.

Oggi, il marchio Lema comprende una gamma di oltre 10.000 referenze tra cui guarnizioni, parti in gomma-metallo (come boccole, silentbloc, manicotti, tubi in gomma, supporti per motori e alberi trasmissione), perni fusi e tappi carburante.

Lema è un marchio private label distribuito da Dubhe Srl.

Dubhe è il distributore italiano specializzato in parti di ricambio per autocarro, veicolo commerciale, bus e rimorchio, con una forte specializzazione sui ricambi motore, cambio e differenziale.

Con oltre 50 anni di esperienza, il gruppo Dubhe offre ai propri clienti una vasta gamma di prodotti sia con marchio proprio che premium.

Grazie all'ampia conoscenza tecnica, produttiva e commerciale delle aziende fondatrici, (Mec-Diesel S.r.l., C.E.I. Costruzione Emiliana Ingranaggi S.p.A. e Lema S.r.l.), Dubhe garantisce elevati standard qualitativi.

ENG

The **Lema** brand was established in 1969 and immediately focused on design, manufacturing, and distribution of spare parts for trucks and buses.

The brand consolidated itself over the years, developing its technical know-how for the manufacturing of gaskets and rubber-metal components processed from high-quality raw materials. The continuous pursuit of excellence is achieved through accurate quality controls applied at every stage of the production process.

The Lema brand currently offers a range of over 10.000 products, including gaskets, rubber-metal parts (such as bushings, silent blocks, sleeves, rubber hoses, engine supports and transmission shafts), king pin kits, and fuel caps.

Lema is a private label distributed by Dubhe Srl.

Dubhe is the Italian distributor specialised in spare parts for trucks and commercial vehicles, buses, and trailers, with a strong specialization on engines, gearboxes, differentials, and their components.

With more than 50 years of experience, Dubhe offers a wide product range under private labels and premium brands.

Thanks to the extensive technical, production and commercial knowledge of the founding companies (Mec-Diesel S.r.l., C.E.I. Costruzione Emiliana Ingranaggi S.p.A. and Lema S.r.l.), Dubhe guarantees high quality standards.

Esclusione di responsabilità

Le informazioni fornite in questo Catalogo Ricambi sono state accuratamente controllate prima della stampa utilizzando la documentazione in nostro possesso; tuttavia Dubhe Srl declina ogni responsabilità per errori ed omissioni che potrebbero essersi verificati. Dubhe Srl si riserva inoltre il diritto di apportare in qualunque momento modifiche tecniche dove ritenute necessarie.

I numeri di riferimento originali e le denominazioni degli articoli conformi agli originali sono indicati a puro scopo comparativo e devono essere utilizzati solo per scopi informativi; in ogni caso non devono assolutamente essere utilizzati nelle fatture ai proprietari dei veicoli, in quanto i nostri articoli non sono originali ma con questi perfettamente intercambiabili.

I dati relativi alle dimensioni degli articoli sono destinati esclusivamente all'identificazione degli articoli e non al controllo qualità; le misure, tolleranze e specifiche tecniche effettive sono riportate all'interno delle schede tecniche di proprietà di Dubhe Srl.

Prima di montare i ricambi esposti in questo catalogo verificare sempre che i pezzi siano adatti allo scopo previsto. In caso di dubbio contattate il nostro Servizio Clienti Tecnico (Tel. +39 051 6030111).

Questo Catalogo è tutelato da Copyright e non può pertanto essere riprodotto, elaborato, adattato, memorizzato (anche digitalmente) su supporti di qualsiasi tipo (inclusi magnetici e ottici), in forma totale o parziale, salvo nostra approvazione scritta.

Exclusion of liability

Every effort has been made to assure that the information in this Spare Parts Catalogue is correct and accurate, using the information and documentation available to us; however Dubhe Srl will not accept any responsibility for errors and omissions in this catalogue. We reserve all rights to modify our components at any time as necessary.

Our spare parts are not sold as original spare parts but are perfectly fitting on them; they are our own branded product. Part numbers and Brand names other than our numbers are used exclusively for reference purposes. Original part numbers are to be used only for comparison purposes and must not be used on invoices.

All data related to dimensions of items can be used only for the correct article identification and not for quality control check; effective dimensions, specifications and tolerances are reported in technical specifications, property of Dubhe Srl. Before installing any replacement parts named in this catalogue, it must be checked whether the parts are suitable for the intended purpose. Our Technical Service Department (Tel. +39 051 6030111) is available for this at any time.

The contents of this publication are the copyright of Dubhe Srl; unauthorised reproduction, modifications, duplication (also on magnetic or optical devices), in whole or in part, is expressly forbidden.

Правовой аспект

Все без исключения данные каталога проходят самую тщательную проверку. Однако, информация, касающаяся типов транспортных средств, производителей и т.д. не может считаться абсолютно точной и полной. Притязания на возмещение убытков на основании данных настоящего каталога нами не принимаются. Мы также оставляем за собой право на технические изменения и совершенствование данного каталога.

Названия, описания, номера транспортных средств и др. приводятся исключительно для внутренних нужд с целью сравнения. То же действительно для номеров оригинальных комплектующих Dubhe Srl по классификации производителей автомобилей и двигателей. Они не являются данными о происхождении товара и не предназначены для владельцев автомобилей.

Данные размеров товаров предназначены для установлении позиций, а не для контроля качества.

Фактические размеры, допуски и спецификации находятся в техпаспортах продуктов, собственность компании Dubhe Srl.

Перед монтажом детали необходимо проверить, соответствует ли она цели предполагаемого использования. Наша служба технической поддержки всегда готова ответить на все Ваши вопросы (тел. +39 051 6030111).

Перепечатка, копирование и размножение информации данного каталога или выдержек из него возможна только с нашего письменного согласия и с указанием источника

ISTRUZIONI PER L'IDENTIFICAZIONE DELLE GUARNIZIONI HOW TO IDENTIFY GASKETS

Su queste pagine troverete tutte le informazioni che vi servono per la vostra ordinazione.
In questo catalogo, la sezione dedicata alle guarnizioni dei motori è stata suddivisa in due parti: "PART 1" e "PART 2".
Per consentirvi di identificare velocemente la guarnizione richiesta, vi sono vari modi:

- Indice dei Modelli (ove presente)
- Indice dei Motori
- Tavole comparative (alla fine del catalogo)

You'll find all the ordering information you need on this page.

In this catalogue, the "engines gaskets section" has been splitted in two-parts: PART 1 and PART 2.

To allow you to quickly and accurately identify the required part, there are different ways:

- Model Index (if there is)
- Engine Index
- Cross-References (at the end of the catalogue)

PART 1

In questa sezione sono raccolte le principali guarnizioni e serie guarnizioni dei vari motori prodotte da LEMA.
Le spiegazioni dei simboli che eventualmente affiancano determinati codici sono raccolte nella parte bassa di ciascuna pagina.

*The contents of this section focus on LEMA production programme of gaskets and gasket sets for various engine types.
You can find explanations of symbols to specific references as footnotes in every pages.*

HOW TO IDENTIFY GASKETS

PART 2

In questa sezione sono raccolte tutte le guarnizioni e le serie guarnizioni prodotte da LEMA non incluse nelle tavole riepilogative. Per comodità di ricerca, le guarnizioni sono state suddivise in base a:

- Tipo di motore
- Gruppo applicativo

I gruppi applicativi utilizzati sono i seguenti:

MONOBLOCCO (include basamento, coperchi, distribuzione)
IMPIANTO ACQUA (include pompa acqua, termostato, sistema di raffreddamento)
IMPIANTO OLIO (include pompa olio, scambiatore, sistema di lubrificazione)
ALTRE (include compressore aria, impianto iniezione)
CAMBIO
ASSALI (include riduttori ruote)
O-RINGS
RONDELLE

In this section you can find all the gaskets and gasket sets not included in the previous section, but included in LEMA delivery programme. To get a more simply search, where possible, gaskets have been divided according to:

- Engine type
- Application group

The application groups are:

CRANKCASE (includes crankcase, covers, timing system)
WATER SYSTEM (includes water pump, thermostat, cooling system)
OIL SYSTEM (includes oil pump, heat exchanger, pipings)
OTHER (includes air compressor, injection system)
GEARBOX
WHEELS (includes planetary gears)
O-RINGS
WASHERS

PART 2 ♦ ALTRE GUARNIZIONI / OTHER GASKETS

	1,5	LEM300015	5	
	2,0	LEM300020	5	

Materiale a base di fibre cellulosiche impregnate con gelatine plasticizzate. Adatto per sigillare guarnizioni per flange e superfici piane. Media compressibilità, buona resistenza meccanica. La temperatura di esercizio è da -20/30°C a +120°C. Buona resistenza a oli, ai combustibili, ai solventi e all'acqua.

Material based on cellulosic fibres impregnated with plasticized gelatines. Ideal as a seal for flanges and flat surfaces. Material with good compressibility and mechanical resistance. The working temperatures is from -20/30 °C to +120 °C. Oil, fuel, solvents and water resistant.

COME LEGGERE LE MISURE NEL CATALOGO HOW TO READ SIZES IN THE CATALOGUE

ATTENZIONE: in questo catalogo le immagini possono non essere in scala; in particolare, tutti i manicotti dritti sono rappresentati per semplicità con la stessa immagine: per questi e per gli altri manicotti le misure (diametro e lunghezza) possono essere dedotte dalle descrizioni dei relativi codici.

ATTENTION: in this catalogue the pictures might be not in scale; for simplicity the pictures of the straight hoses are the same: to verify the sizes (diameter and length) of all hoses (straight or bended) read carefully the description of each item.

Caratteristiche tecniche / Technical characteristics

Rinforzo	= 3/4/5 tessuti in poliestere
	- da Ø 10 a Ø 48: 3 tessuti
	- da Ø 50 a Ø 95: 4 tessuti
	- oltre Ø 100: 5 tessuti
Reinforcement	= 3/4/5 ply polyester
	- from Ø 10 to Ø 48: 3 ply
	- from Ø 50 to Ø 95: 4 ply
	- above Ø 100: 5 ply
Temperature	= da -40°C a +250°C
Temperature	= from -40°C (-40°F) to +250°C (+482°F)
Impiego	= acqua
Applications	= water
Press. esercizio	= 3.0 bar
Working pressure	= 3.0 bar

INFORMAZIONI TECNICHE TECHNICAL NOTES

NUOVA LINEA DI PRODOTTI / NEW PRODUCT LINE / NOUVELLE LIGNE DE PRODUITS

Nel pieno rispetto della propria missione, LEMA continua a introdurre e sviluppare nuove linee di prodotto. L'ultima novità LEMA è l'introduzione nella propria gamma di ricambi degli elementi di fissaggio quali viti, dadi e colonnette per fissaggio ruote.

Tutti gli articoli che abbiamo introdotto rispettano, come sempre, le norme più severe in merito ai controlli dimensionali e alla qualità dei materiali. Per questo, il nostro ufficio tecnico è stato implementato con l'introduzione di nuove attrezzature in grado di eseguire tutte le prove necessarie per assicurare il corretto funzionamento dei particolari (vedi foto). L'assortimento iniziale verrà regolarmente ampliato in modo da soddisfare le costanti esigenze dei nostri clienti.

In full compliance with its mission, LEMA continues to introduce and develop new product lines.

The latest LEMA innovation is the introduction in its range of spare parts of fasteners such as screws, nuts and wheel bolts.

All the items we have introduced comply, as always, with the strictest rules regarding dimensions controls and materials quality. For this reason, our technical department was improved with the introduction of a new equipment, which will ensure the

correct operating principles of all the items (see photo). The starting assortment will be regularly expanded in order to meet the constant needs of our customers.

En pleine conformité avec sa mission, LEMA continue d'introduire et de développer de nouvelles gammes de produits.

La dernière innovation de LEMA est l'introduction dans sa gamme de pièces détachées de fixations telles que vis, écrous et boulons de roue.

Tous les articles que nous avons présentés respectent, comme toujours, les règles les plus strictes en matière de contrôle des dimensions et de qualité des matériaux. Pour cette raison, notre service technique s'est amélioré avec l'introduction d'un nouvel équipement, qui garantira le bon fonctionnement de tous les éléments (voir photo). L'assortiment de départ sera régulièrement élargi afin de répondre aux besoins constants de nos clients.

INFORMAZIONI TECNICHE

TECHNICAL NOTES

Rivestimenti protettivi / Protective coatings / Les revêtements de protection

FOSFATAZIONE

È un processo chimico che consente di alterare la superficie di un metallo mediante la creazione di cristalli fosfatici, migliorandone la resistenza alla corrosione e facilitando il successivo ed eventuale processo di verniciatura. Può essere effettuata allo zinco o al manganese.

GEOMITRIZZAZIONE (NO CROMO)

Rivestimento a base acquosa contenente zinco e alluminio in forma lamellare, assicura, con un basso spessore, ai pezzi trattati una protezione molto elevata dalla corrosione ambientale e dalla corrosione bimetallica. Resiste a temperature fino a 250÷280°C e non dà alcuna fragilità da idrogeno. La Geomittrizzazione è attualmente uno standard mondiale dei sistemi di rivestimento protettivi per gli elementi di fissaggio (viti, bulloni, dadi, ecc.).

Aspetto esteriore: argento opaco

Vantaggi: rivestimento duttile, adatto a particolari sottoposti a deformazioni elastiche, resistente al calore fino a circa 250÷280°C, verniciabile.

Svantaggi: nessuno

ZINCATURA ELETTROLITICA

Rivestimento di zinco applicato sul metallo principalmente come protezione dalla corrosione galvanica. Esistono diverse tipologie e cromatazioni, dalla classica e più utilizzata bianca a quella iridescente fino ad arrivare a quella estetica nera.

ZINCATURA A CALDO

Applicazione su base ferrosa di un grosso spessore di zinco eseguita per immersione diretta dei particolari nello zinco fuso (appunto "a caldo"); comporta una variazione dimensionale significativa dei particolari della quale va tenuto conto. Dopo tanti anni e l'avvento di nuove metodologie, è ancora oggi ritenuta una delle protezioni più efficaci e durature.

PHOSPHATE COATING

This is a chemical process that alters the surface of a metal through the creation of phosphate crystals, improving its resistance to corrosion and facilitating subsequent painting processes. It can be performed with zinc or manganese.

GEOMITRISATION (CHROME-FREE)

A water-based coating containing zinc and aluminium in sheet form, it ensures, with a thin layer, to the treated pieces a very high protection from bimetallic and environmental corrosion. It resists temperatures up to 250÷280°C and does not give any hydrogen brittleness. In particular Geomitrisation is a worldwide standard for use on fasteners (screws, bolts, nuts, etc.).

Appearance: matte silver

Advantages: ductile coating, suitable for parts subjected to elastic deformations, heat resistant up to about 250÷280°C, paintable

Disadvantages: none

ELECTROLYTIC GALVANIZING

Zinc coating applied to metal mainly as protection from galvanic corrosion. There are different types and chromate treatments, from the classic and more commonly used white to iridescent and even black.

HOT GALVANIZING

Application of a thick zinc layer on a ferrous base by direct immersion of the parts in molten zinc (therefore "hot"). It significantly changes the size of the parts, which must be taken into account. After many years and the arrival of new methods, it is still considered one of the most efficient and durable protections.

PHOSPHATATION

Il s'agit d'un processus chimique qui permet d'altérer la surface d'un métal par la création de cristaux phosphatiques, améliorant ainsi sa résistance à la corrosion et facilitant l'éventuel processus de peinture ultérieur. Il peut se faire au zinc ou au manganèse.

GEOMITRISATION (CHROME-FREE)

Revêtement à base d'eau contenant du zinc et de l'aluminium sous forme de feuille, il assure, en couche mince, aux pièces traitées une très haute protection contre la corrosion bimétallique et environnementale. Il résiste à des températures jusqu'à 250÷300°C et ne donne aucune fragilité à l'hydrogène. En particulier, la Géomitrisation est une norme mondiale d'utilisation sur les éléments de fixation (vis, boulons, écrous, etc.).

Aspect : argent mat

Avantages : revêtement ductile, adapté aux pièces soumises à des déformations élastiques, résistant à la chaleur jusqu'à environ 250÷280°C, paintable.

Inconvénients : aucun

GALVANISATION ÉLECTROLYTIQUE

Revêtement en zinc appliqué sur le métal surtout pour le protéger contre la corrosion galvanique. Il en existe différents types et chromatages, du plus classique et plus utilisé, le blanc, à la version irisée pour arriver à la noire plus esthétique.

GALVANISATION À CHAUD

Application sur base ferreuse d'une grosse épaisseur de zinc effectuée par immersion directe des pièces dans le zinc fondu (d'où le nom « à chaud »). Soumises à ce traitement, les dimensions de pièces peuvent fortement varier, il faut donc en tenir compte. Malgré les années passées et le développement de nouvelles méthodes, cette technique est encore aujourd'hui considérée comme une des protections les plus efficaces et durables.

HEAVYBELT **AVX**

CINGHIE TRAPEZOIDALI DENTELLATE / V-BELTS RAW EDGE, MOULDED COGGED

È La cinghia storica per eccellenza.

Nonostante sia una cinghia con un numero minore di applicazioni rispetto al passato, la cinghia AVX **HEAVYBELT** LEMA rimane sempre un prodotto altamente tecnologico costruito seguendo gli standard qualitativi più alti.

Ne consegue un prodotto che non ha nulla da invidiare al prodotto OE sia come costruzione che come durata nel tempo.

Le cinghie AVX **HEAVYBELT** sono disponibili con larghezza da 10 mm e da 13 mm.

AVX is the main historical belt.

*Despite its lower number of applications compared to the past, the AVX **HEAVYBELT** belt is a high technological product, manufactured following the highest standards of quality. The result is a long-lasting product, whose construction can be totally compared to the OEM product.*

*AVX **HEAVYBELT** belts are available in 10 mm and 13 mm width.*

HEAVYBELT **PK**

CINGHIE POLI-V / MULTIGOLA / RIBBED BELTS

Costruite guardando al futuro, le cinghie POLI-V **HEAVYBELT** LEMA sono tutte costruite in EPDM per avere un prodotto estremamente flessibile e resistente alle alte temperature (-40 °C/+120 °C), nel rispetto degli standard qualitativi più alti sia in termine di precisione dei profili che in termine di controllo in lunghezza.

Il risultato è una cinghia di elevate prestazioni, lunga durata e alta resistenza, tutto quanto richiesto da un ricambio per il settore TRUCK e BUS.

Tutte le cinghie **HEAVYBELT** sono realizzate partendo dallo studio del campione OE per una più precisa adattabilità nei veicoli di ultimissima generazione.

All'interno della gamma **HEAVYBELT** POLI-V sono presenti anche tipologie di cinghie ELASTICHE (EPK), indispensabili in tutti i casi in cui sia richiesto il montaggio senza l'utilizzo di tenditore.

*POLI-V **HEAVYBELT** LEMA belts are manufactured in EPDM, a temperature resistant rubber (-40 °C/+120 °C), which guarantees the best flexibility, in full compliance with the highest quality standards for both profiles precision and length control. The result is a high performing, long-lasting and resistant belt, the best solution for our trucks and buses spare parts sector.*

*Every **HEAVYBELT** belt is manufactured starting from the OEM sample, in order to adapt to the latest generation of vehicles. Inside the **HEAVYBELT** POLI-V assortment are also available ELASTIC BELT (EPK), to supply the request of an assembly without tension.*

HEAVYBELT **XPB**

CINGHIE TRAPEZOIDALI DENTELLATE / V-BELTS RAW EDGE, MOULDED COGGED

Cinghie altamente performanti studiate espressamente per gli impianti di condizionamento dei principali BUS, le cinghie XPB **HEAVYBELT** LEMA sono state progettate e costruite per resistere alle alte temperature e all'uso critico in applicazioni su AUTOBUS.

Sono disponibili nella versione singola e nella versione multigola.

*High-performing belts expressly manufactured for the air-conditioning of the most important buses. XPB **HEAVYBELT** LEMA belts are specifically manufactured to resist to high temperatures and for bus applications.*

These belts are available in single or Poly-V version.

INFORMAZIONI TECNICHE TECHNICAL NOTES

I tendicinghia sono i componenti che, agendo direttamente a contatto della cinghia, provvedono a garantirne la corretta tensione durante l'utilizzo, sia essa per scopi di distribuzione che ausiliari. I prodotti trattati possono essere suddivisi in due categorie: tendicinghia e cuscinetti di rimando (o galoppini).

Tensioners are the components that, by directly interacting with the belt, ensure their proper tension during use, both for distribution and auxiliary purposes. The treated products can be classified into two categories: tensioners and idler pulleys.

I tendicinghia, che costituiscono la categoria più completa e complessa, sono generalmente composti da una base di supporto fissata solidamente al monoblocco tramite bulloni passanti. La base include un cuscinetto su cui scorre la cinghia e un braccio tenditore. Questo braccio, attraverso un meccanismo che può essere di tipo meccanico, a molla o idraulico, esercita tensione sulla cinghia tramite il cuscinetto.

Tensioners, representing the most comprehensive and complex category, are typically composed of a support base firmly connected to the engine block through passing bolts. The base includes a idler pulley on which the belt slides, and a tensioning arm. This arm, through a mechanism that can be mechanical, spring-loaded, or hydraulic, applies tension to the belt through the idler pulley.

La scelta più comune tra i costruttori ricade sui tendicinghia a molla, che offrono un ottimo equilibrio tra vantaggi tecnici e costruttivi, senza compromettere la qualità e la durabilità del prodotto stesso.

The most common choice among manufacturers is spring-loaded tensioners.

L'evoluzione tecnica di questa categoria di prodotti ha portato a vantaggi sempre maggiori. Di seguito, i principali:

They offer an excellent balance between technical and construction advantages without compromising quality and durability.

- Facilità di installazione e smontaggio della cinghia;
- Tensione costante corretta in qualsiasi situazione di utilizzo;
- Smorzamento delle vibrazioni trasmesse dalla cinghia (applicabile solo a sistemi di tensione mobili come molla o idraulici);
- Manutenzione ridotta al minimo grazie alla capacità dei tendicinghia di compensare il naturale allungamento della cinghia nel tempo;
- Facilità di sostituzione in caso di problemi.

The technical evolution of this product category has led to increasingly significant benefits.

Below, the main ones:

- Ease of belt installation and removal;
- Consistently correct tension in any usage scenario;
- Vibration damping transmitted by the belt (applicable only to mobile tension systems such as spring or hydraulic);
- Minimal maintenance thanks to the tensioners ability to compensate for the natural belt elongation over time;
- Ease of replacement in case of issues.

Un accenno particolare va fatto ai tendicinghia o tendicatena idraulici, che svolgono la stessa funzione ma sono azionati da un piccolo ammortizzatore installato sul gruppo tenditore o direttamente dalla pressione dell'olio motore.

A particular mention should be made of hydraulic tensioners or chain tensioners, which perform the same type of work but are actuated by a small damper installed on the tensioner assembly or directly by the engine oil pressure.

I cuscinetti di rimando, comunemente chiamati galoppini (per analogia di utilizzo con la parola francese galopin, che significa messaggero), consistono in una puleggia installata su un cuscinetto, volta a deviare il tratto non tensionato della cinghia per garantirne maggiore aderenza durante la rotazione. Sia i cuscinetti montati sui tendicinghia che i galoppini possono essere realizzati in materiale plastico, acciaio zincato o, più raramente, in alluminio.

The idler pulleys consist of a pulley installed on a bearing. They are designed to redirect the slack portion of the belt to ensure greater grip during rotation.

Both the bearings mounted on the tensioners and the idler pulleys can be made of plastic, galvanized steel, or, more rarely, aluminum.

ESPOSITORE PER TAPPI SERBATOIO FUEL CAPS DISPLAYER

Abbiamo progettato questo espositore per permettervi di dare più visibilità a questa gamma di accessori.

L'espositore viene fornito completo di 12 tipi di tappi LEMA (4 tappi per ogni tipo) che hanno una grande movimentazione e garantisce quindi la risposta ideale alla maggior parte delle esigenze nel settore dei veicoli industriali europei.

Nel vassoio alla base dell'espositore trovano posto due scatole di prefiltri carburante LEMA universali.

Il montaggio è estremamente semplice e rapido (con un foglietto di istruzioni incluso) e permette di ottenere un prodotto con ottima stabilità e resistenza. La struttura è in cartone e comprende 12 ganci in metallo.

Dimensioni (LxPxH): 60x38x185 cm

This displayer has been designed to help you give more visibility to this range of products.

It is wholly furnished of 12 different fuel caps LEMA (4 caps of each type) which are fast moving goods, in order to guarantee your customer satisfaction.

On the basis there is also place for two boxes of fuel prefilters LEMA. Extremely easy and fast assembly (instructions for assembling included). Great stability and resistance.

Cardboard structure with 12 metal hooks.

Dimensions: (LxWxH): 60x38x185 cm

LEMGC210

Ø 10

- ATTACCHI RAPIDI • QUICK RELEASE COUPLING
- CON MAGNETE E VALVOLA DI NON RITORNO • WITH MAGNET AND NON-RETURN VALVE
- Ø 10 mm
- CONF. MIN / PACKING UNIT: 12 pcs.

LEMGC212

Ø 12

- ATTACCHI RAPIDI • QUICK RELEASE COUPLING
- CON MAGNETE E VALVOLA DI NON RITORNO • WITH MAGNET AND NON-RETURN VALVE
- Ø 12 mm
- CONF. MIN / PACKING UNIT: 12 pcs.

O-RING: garantisce la massima tenuta anche in presenza di vibrazioni
O-RING: it guarantees a perfect hold also in case of vibrations

MAGNETE: elimina la polvere di ferro presente nel carburante ed ha una valvola di non ritorno
MAGNET: it withholds metallic powders and it's equipped with non-return valve

FILTRO: in ottone, elimina le impurità
FILTER: brass filter element, removes any impurity

RACCORDI AD INNESTO RAPIDO: per un montaggio veloce e semplice utilizzare tubi Rilsan PA11 perfettamente calibrati
QUICK RELEASE COUPLING: for a correct and fast assembly use Rilsan calibrated hoses PA11

PREFILTRI CARBURANTE FUEL PREFILTERS

FILTRO GASOLIO PER COPPA IN VETRO
DIESEL FILTER FOR FOR GLASS BOWL

LEMND215

Ø 15

- Ø 13/15 mm
- CONF. MIN / PACKING UNIT: 12 pcs.

PREFILTRI CARBURANTE FUEL PREFILTERS

FILTRO PESCANTE GASOLIO PER FURGONI CATCHING FILTER FOR DIESEL PICK-UP AND VANS

LEMPA210

Ø 10

- Ø 10 mm
- CONF. MIN / PACKING UNIT: 10 pcs.

PREFILTRI CARBURANTE FUEL PREFILTERS

FILTRO PESCANTE GASOLIO DIESEL CATCHING FILTER

LEMPD208

- Ø 8 mm
- CONF. MIN / PACKING UNIT: 10 pcs.

Ø 8

LEMPD210

- Ø 10 mm
- CONF. MIN / PACKING UNIT: 10 pcs.

Ø 10

PREFILTRI CARBURANTE FUEL PREFILTERS

FILTRO PESCANTE GASOLIO PER VEICOLI INDUSTRIALI DIESEL CATCHING FILTER FOR INDUSTRIAL VEHICLES

LEMPG208

Ø 8

- Ø 8 mm
- CONF. MIN / PACKING UNIT: 10 pcs.

LEMPG210

Ø 10

- Ø 10 mm
- CONF. MIN / PACKING UNIT: 10 pcs.

LEMPG212

Ø 12

- Ø 12 mm
- CONF. MIN / PACKING UNIT: 10 pcs.

LEMPG214

Ø 14

- Ø 14 mm
- CONF. MIN / PACKING UNIT: 10 pcs.

INDICE INDEX

Particolari Vari Miscellaneous

- Prodotti chimici / *Chemicals*.....904
- Fascette stringitubo / *Hose clamps*.....906

PRODOTTI CHIMICI CHEMICALS

SILNERO

■ Sigillante siliconico nero monocomponente a polimerizzazione acetica. Polimerizza a temperatura ambiente formando guarnizioni permanenti ed elastiche. Ha un'eccellente adesione alle gomme siliconiche. Resiste ad alte temperature in un intervallo da -40 °C a +260 °C. È stabile per brevi periodi a +275 °C. Resiste a picchi di +300 °C. La sua speciale formula ne consente l'impiego anche su superfici verticali in quanto non cola. E' subito secco al tatto.

■ *Black silicone, one-part, acetic-curing sealant. It cures at room temperature to give a permanently flexible silicone rubber. It has an excellent adhesion to silicone rubbers. Withstands high temperatures in the range of -40 °C to +260 °C. It is stable for short periods at +275 °C. Withstands peaks of +300 °C. It can be used also on vertical surfaces because it is a slump paste. It is immediately dry to the touch.*

REF.	Forma di fornitura Form of delivery	Contenuto Capacity	Conf. minima Packing unit
LEMC130	Cartuccia autoestrudente Self-extruding cartridge	200 ml	Scatola con 6 cartucce Box with 6 cartridge

LEMAFIX

■ Prodotto monocomponente anaerobico a forte resistenza. Polimerizza spontaneamente in assenza di aria all'interno di superfici metalliche. Adatto alla frenatura di viti, dadi, prigionieri e altre parti filettate contro l'allentamento causato dalle vibrazioni o dove è necessaria una elevata resistenza all'olio caldo. Resistente alle vibrazioni e all'olio caldo. La sua alta resistenza meccanica non consente lo smontaggio delle parti con normali utensili.

■ *One component, anaerobic material, high strength threadlocker. It cures quickly when closed in absence of air between close fitting metal surfaces. By excluding air and maintaining close fitting metal surfaces, a sealing film is formed that prevents loosening through vibration and leakage and is resistant to hot oil. Recommended for use on metal fasteners (screws, nuts, studs, etc...) where removal for maintenance is not required. Useful for permanently locking studs on engine blocks and pump housings.*

REF.	Forma di fornitura Form of delivery	Contenuto Capacity	Conf. minima Packing unit
LEMC270	Flacone Bottle	50 ml	10 flaconi 10 bottles

PRODOTTI CHIMICI CHEMICALS

SIGIL-V

■ Resina liquida metacrilica anaerobica verde a media resistenza. Indurisce lentamente in assenza di aria dopo l'assemblaggio delle superfici metalliche.

La soluzione ideale per accoppiare tra di loro parti piane metalliche come scatola del cambio, coperchio del differenziale, ecc...

Resistente all'acqua, ai carburanti e agli olii minerali, assicura anche una elevata resistenza ai colpi e alle vibrazioni. La temperatura di esercizio è da -55 °C a +150 °C.

■ *Green anaerobic methacrylic resin, medium resistance.*

By excluding air and maintaining metal contact to the connecting components, a sealing film is formed that is resistant to water, fuel and oil and it's vibration-proof. The working temperatures is from -50 °C to +150 °C.

It's the perfect solution to sealing plan metal components as gearbox and differential housing, bearings cover, etc. Even when this film hardens, the components can still be removed easily.

REF.	Forma di fornitura Form of delivery	Contenuto Capacity	Conf. minima Packing unit
LEMC510	Flacone a soffietto Plastic bellows bottle	125 ml	1 flacone 1 bottle

LEMASBLOK

■ Sbloccante - Lubrificante - Anticorrosivo

Utile in tutte le occasioni in cui si rende necessario sbloccare e lubrificare parti meccaniche cementate da ruggine, incrostazioni, ecc...

Grazie ai suoi particolari componenti, svolge anche una persistente azione protettiva contro la ruggine sui particolari trattati.

■ *Loosening - Lubricating - Anti-rust*

It has to be used when it's necessary divide or lubricate mechanical components seized by rust.

It is useful also for its long-time, anti-rust protective action.

Materiale

Banda e carrello: acciaio AISI 430

Vite e molla: acciaio Inox 410

Caratteristiche

Queste fascette sono la soluzione perfetta per applicazioni soggette a forti escursioni termiche.

Un meccanismo con molla a tazza permette alla fascetta a coppia costante di aumentare o diminuire automaticamente il proprio diametro in seguito a variazioni di temperatura di funzionamento o ambientale, eliminando così le perdite sulle connessioni in condizioni di "applicazioni fredde" e consentendo un notevole risparmio sui costi di manutenzione e di rabbocco dei fluidi.

Applicazioni

- Impianti climatizzazione
- Impianti scarico fumi
- Circuito raffreddamento motori
- Circuito intercooler

Consigli sul montaggio

Il rendimento delle fascette Constant Torque è strettamente connesso al rispetto della tabella delle coppie di serraggio indicate.

Una coppia errata può inibire il lavoro della molla ed la conseguente capacità di assorbire le dilatazioni dei materiali.

Si consiglia vivamente di utilizzare, in fase di montaggio, un cacciavite dinamometrico o un avvitatore tarato nel rispetto delle coppie di serraggio indicate.

Material

Band and housing: AISI 430 steel

Screw and spring: AISI 410 stainless steel

Characteristics

This clamps is the perfect solution for applications exposed to temperature changes.

A Belleville spring mechanism permits the constant torque clamp to automatically increase or decrease its own diameter due to changes in operational or environmental temperatures, eliminating "cold flow" leaks and allowing considerable savings in maintenance and fluid topping costs.

Applications

- Air conditioning systems
- Fume exhaust systems
- Engine cooling system
- Intercooler system

Assembly Tips

The performance of Constant Torque clamps is strictly connected to compliance with the table of indicated tightening torques.

An incorrect torque can inhibit the work of the spring and the consequent ability to absorb the expansion of the materials.

It is strongly recommended to use, during assembly, a torque screwdriver or a screwdriver calibrated in compliance with the indicated tightening torques.
